Source History

```java
package com.mycompany.webserviceclient;

import java.io.BufferedReader;
import java.io.InputStreamReader;
import java.net.HttpURLConnection;
import java.net.URL;

public class WebServiceClient {

    public static void main(String[] args) {
        try {
            // Your REST API URL
            URL url = new URL("http://localhost:8080/WebService-1.0-SNAPSHOT/webresources/hello");

            HttpURLConnection conn = (HttpURLConnection) url.openConnection();
            conn.setRequestMethod("GET");

            int responseCode = conn.getResponseCode();

            if (responseCode == 200) {
                BufferedReader in = new BufferedReader(
                        new InputStreamReader(conn.getInputStream())
                );

                String inputLine;
```
